

2 / 1 / 21

Over the past weekend we improved lighting and the projection/set reconstruction and folded those into a new composite.

We have it in a new edit that includes music. We have materials on hand to make a new edit with improved textures and animation and are just waiting on files to transfer. So that will be ready for Midterm Review.

The techniques used in the composite are ready receive critique, meaning the believability of the projection method.
